

MIGUEL DE LA LAMA

Austin, TX | 310-867-9391 | delalama.miguel@gmail.com | [linkedin.com/in/migueldelalama](https://www.linkedin.com/in/migueldelalama)

Executive Summary:

AI and platform product leader with 10+ years of experience building and modernizing technically complex digital products, including 7+ years defining product strategy, roadmaps, requirements, and phased delivery plans. Proven success launching 0-to-1 GenAI tools, AI/ML-enabled platforms, and enterprise workflow solutions in partnership with Engineering, Data Science, UX, Analytics, Legal, Privacy, QA, and Operations.

Experienced applying AI-assisted development tools within GitHub-based, cloud-native workflows spanning planning, implementation, testing, debugging, documentation, staged releases, and production validation. Strong track record using telemetry, user feedback, productivity metrics, quality signals, and business outcomes to prioritize investments and improve adoption across platforms serving 30M+ monthly users.

Core Strengths:

AI-Native Product Strategy | Developer Experience & Engineering Productivity | Cloud-Native Platforms | 0-to-1 Product Development | Agentic & GenAI Workflows | Product Roadmaps & Requirements | Product Analytics & Telemetry | Enterprise Governance | Cross-Functional Leadership | Adoption & Success Metrics

Professional Experience:

Senior Product Manager, Platform & Personalization — **AT&T**

Austin, TX | 2021 – Present

- Define product strategy, roadmaps, requirements, and prioritization for AI/ML-enabled internal tools and customer-facing platforms spanning personalization, experimentation, content operations, and multilingual experiences across digital surfaces serving 30M+ monthly users.
- Translate complex user, operational, and technical needs into clear product requirements, success metrics, acceptance criteria, dependencies, and phased delivery plans in partnership with Engineering, Data Science, UX, Analytics, Marketing, Legal, Privacy, QA, and Operations.
- Conceived and led the 0-to-1 development of Atlas, a GenAI tool that generates psychographic content variations at scale, improving team productivity 17%, customer engagement 25%, and revenue 15% across prepaid and accessories experiences.
- Identified the opportunity, secured investment, and led end-to-end development of Fluently, a translation-as-a-service platform supporting att.com/es-us. Coordinated 30+ cross-functional contributors and defined requirements for automation, quality controls, human review, and resilient delivery, reducing turnaround time 99%, lowering defects approximately 50%, and generating \$8M+ in annual OPEX savings.
- Modernized audience segmentation from manual rules to ML-driven psychographic models, increasing CTR 8%, engagement 12%, and reducing audience build time 25%.
- Partner with Engineering and Data Science to develop behavioral telemetry, audience decisioning, experimentation, and model-retraining capabilities that connect product usage and performance signals to roadmap decisions.
- Define and track adoption, engagement, conversion, productivity, cycle-time, quality, and experimentation metrics to prioritize investments and guide continuous product improvement.
- Collaborate with Legal, Privacy, Analytics, and governance teams to establish requirements for responsible AI, customer data use, access controls, platform integrations, and experimentation in a regulated enterprise environment.

Product Manager, Digital Strategy — AT&T

Los Angeles, CA | 2020 – 2021

- Co-authored a five-year roadmap for a digital wallet platform supporting hundreds of millions of annual transactions, aligning SVP, Finance, and Product leadership on phased investment and risk-aware rollout.
- Conducted TAM and opportunity modeling across 750M+ payment transactions, informing prioritization of core data and platform capabilities.
- Led early-stage experimentation and data-driven pilots balancing customer value, operational feasibility, and governance constraints.

Associate Director, Digital Innovation (Product) — Saatchi & Saatchi / Conill

Los Angeles, CA | 2019 – 2020

- Built and led cross-functional product and engineering teams (up to 10 direct contributors), delivering predictive systems and AI-enabled tools that reduced operational effort 60–70%.
- Owned vendor-integrated data solutions leveraging NLP, computer vision, and predictive analytics to accelerate insight generation and improve forecast accuracy.
- Productized data-driven innovation offerings generating 30–45% YoY revenue growth across Fortune 500 clients.

Digital Innovation Manager (Product) — Saatchi & Saatchi / Conill

Los Angeles, CA | 2017 – 2019

- Drove product performance optimization through analytics-driven process redesign and agile sprint restructuring, delivering ~50% cost reduction and significantly faster delivery across multiple initiatives.
- Managed and mentored a 10-member product and engineering team, increasing throughput while developing junior PMs into senior contributors and strengthening execution accountability.

Earlier Experience — Saatchi & Saatchi / Conill

Los Angeles, CA | 2012 – 2017

Education & Certifications:

- BBA, Marketing, University of Texas at El Paso
- Post-Graduate Program in Artificial Intelligence & Machine Learning, UT Austin McCombs School of Business (2024)
- Product Strategy, Northwestern Kellogg School of Management (2021)
- Artificial Intelligence: Implications for Business Strategy, MIT Sloan & MIT CSAIL (2018)
- UX Research & Strategy, UCLA Extension (2013)

Selected AI-Native Product Development

- Lead product strategy and hands-on delivery for TraceGuard AI, a 0-to-1, cloud-native, multi-tenant SaaS platform using AI document extraction and agentic workflows to support food traceability and recall operations.
- Manage the Develop-phase workflow across product requirements, backlog prioritization, repository-based collaboration, testing, debugging, documentation, staged environments, production-readiness validation, and releases using GitHub, Vercel, Supabase, and AI-assisted development tools.
- Define enterprise requirements for role-based access, tenant isolation, audit history, data governance, security, reliability, and regulated workflows, translating failure states and user feedback into phased releases and measurable acceptance criteria.

Additional Information:

- Languages: English and Spanish
- Technical Environment: GitHub, Vercel, Supabase, API integrations, cloud deployments, staging and production validation, Claude Code, Codex, and Cursor
- AI/ML Focus: Generative AI, agentic workflows, RAG frameworks, experimentation pipelines, behavioral telemetry, model evaluation, and AI governance
